

Genesis: The Key to the Bible
(Part 6) Differentiation of Living Things

Evolution says every form of life started in a toxic primordial soup and can be chased back to one molecule that occurred

Over a period of _____ of years, the cells divided and differentiated to form every type of plant, animal, bacterial and viral life

The bible says that after establishing _____ in the universe, God set about creating the life that would _____ from his meticulous engineering

(Genesis 1:20-31) Fish, birds, animals, and man

(v.20-23) things that swim and things that fly

God creates _____ types of living creatures from nothing that preexists his action

Fish and other life capable of reproducing their own kind

Birds of every kind capable of reproducing their own kind

End of the fifth day (period) all is still good

(v.24-30) Animals and mankind

God again creates specific types of living creatures from nothing

All types of animals that can reproduce their own kind

Wild animals, livestock, small animals each differentiated from every other

God creates man to be _____ from fish, birds, or animals

(v.26) first allusion in scripture to _____

(v.27) Mankind is made in the image of God, able to reflect the _____ of God

Will, intellect, emotion, creativity, _____

(v.28) Mankind is the _____ of God's creativity

Only man has the innate capability of _____ and ability to interact with God

Given rule or dominion over the other created beings

(v. 30) Mankind and animals are originally _____ as death does not exist yet

(V.31) God is _____, his creative work is completed, and he calls it very good

The four greatest question we must answer are

Who am I? Where did I come from? What is my _____? Where am I going?

If man came from _____ through chance, as the evolutionist says, then man is faced with a horrifying dilemma: he has no planned beginning, no purpose, no _____.
